## Career Objective

---

Enthusiastic Computer Science student seeking an opportunity in software development to apply full-stack programming skills, improve technical knowledge, and contribute effectively to innovative projects.

## Education

---

**Sahyadri College of Engineering and Management**

2023 – 2027

Bachelor of Engineering in Computer Science

**CGPA: 8.51**

## Projects

---

### Student Task Management System – Full-Stack Web Application

- Developed a responsive task-tracking platform using React.js and Tailwind CSS for real-time academic assignment management.
- Integrated a secure dual-login system featuring Google OAuth 2.0 and a Django REST API for manual credential verification.
- Engineered a robust Django and MySQL backend utilizing asynchronous requests for seamless, user-specific data retrieval.

### NutriVision AI – Full-Stack AI Diet Planner

- Built a food recognition system using CNN (EfficientNetB0) and YOLOv8 for meal identification.
- Automated nutritional tracking using USDA Food Database API and developed a Django backend.
- Implemented real-time visualization dashboards for personalized diet insights.

### Stock Intelligence Portal – Full-Stack Financial Analytics Platform

- Developed a decoupled REST architecture using Django 5 and Next.js 16, implementing a Service Layer Pattern and JWT-based authentication.
- Built an automated IPO tracker and sentiment engine using BeautifulSoup4 and Finnhub API, featuring an intelligent 30-minute caching layer for API optimization.
- Engineered a stock analysis engine with yfinance to track NSE data, incorporating CSV import support for Groww/Zerodha and real-time Recharts visualizations.

## Technical Skills

---

**Languages:** HTML, CSS, JavaScript, Java, Python

**Frameworks:** Django, React, Next.js, Tailwind CSS

**Databases:** MySQL, MongoDB

**Tools:** VS Code, Git, GitHub

## Additional Information

---

- Strong interest in Full Stack Development and AI-powered web applications.
- Experience merging complex frontend and backend repositories into unified Git workflows.
- Knowledge of RESTful API architecture and relational database management.
